

Intent

- Users (starting with advocates, but ideally even PiPs without legal training) are able to put matters before the court with low effort.
Metric: Time taken to submit an application.
- Advocates are able to delegate matters to their juniors and clerks.
Metric: Applications drafted by clerks and junior advocates
- Applications are used as an asynchronous way to place matters before the court, paving the way for the case to move forward without hearings.
Metric: Number of applications raised before hearings, percentage of applications dealt with outside of hearings

Design Notes

- Aadhar-based signing is a pain point for the advocates. Given that these users are already logged in, a simpler mode of signing can be considered.
- The review and signing workflow must take into account that drafts are created by clerks or junior advocates, and a final review and signing by the main advocate is required.
- After an application is filed, the opposing counsel might raise objections to the application, given that we have a timeline crunch and that applications are always reviewed in hearings. We don't need to design or build the full objection-raising feature immediately, as long as the design accommodates an extension in the future.

General Workflow

[Link](#)

Initial Status	Action	Actor	New Status
-	Create	Advocate/PiP	Draft
Draft	Proceed to Sign	Advocate/PiP	Pending Signature
Pending Signature	Sign	Advocate/PiP	Pending Payment
Pending Payment	Pay	Advocate/PiP/Litigant	Submitted/Pending Review
Pending Review	Accept/Reject	Magistrate	Accepted/Rejected
Draft/Pending Signature/Pending Payment	Expire	System	Expired

Users and Actions

User	Actions
Advocate/PiP	• Create draft • View own drafts and drafts created by associated clerks and junior advocates • Sign own drafts and drafts created by associated clerks and junior advocates • Make payment for own applications and applications created by associated clerks and junior advocates • View all submitted applications
Clerk and Junior Advocate	• Create drafts • View own drafts and drafts created by associated advocates • Make payment for own applications and applications created by associated advocates • View all submitted applications
Litigant	• Make payment for all applications submitted on their behalf • View all submitted applications
PoA-Holder	• Make payment for all applications submitted on their litigant's behalf • View all submitted applications
Benchclerk and Typist	• View all submitted applications • Create drafts of orders in response

Magistrate	• View all submitted applications • Create drafts of orders in response • Sign and issue orders
------------	---

Pending Tasks

Task	Users	Creation Trigger	Closure Trigger	Deadline
Sign Application	Advocate/PIP	Application finalised	Application signed or deleted	Same day
Make Payment	Advocate/PIP, litigant and litigant's PoA-holder on whose behalf application is being raised, clerk, junior advocate	Application signed	Payment made or application deleted	Same day
Review application	Benchclerk, typist, magistrate	Application submitted (payment made)	• Application accepted/rejected • For rescheduling applications: hearing associated with application passes/is rescheduled	

Notifications

Please note that there will be a master file containing notifications across the entire application. This will be the final source of truth. The message text here is very rough to indicate the contents, not the proposed final text.

Trigger	Message	Recipients
Application moves to pending signature state.	An application is pending your signature	Filing advocate
Application is submitted	An application has been filed by one of the counsels.	All parties on the same side of the case
Application is submitted	An application has been filed by opposing counsel	All parties on the opposite side of the case
Application is accepted or rejected	Application <cmpnumber> has been accepted/rejected	All parties to the case.

Events

Trigger	Event	Attributes
Application submitted	application-submitted	Application Type, Raised By, PartyType (Prosecution/Defence), Date, Application Number
Application accepted	application-accepted	Application Type, Date, Order Number, Reference Application Number
Application rejected	application-rejected	Application Type, Date, Order Number, Reference Application Number

Application List

No.	Master Data for Applications Types:	Visibility Logic	Associated Workflows
-----	-------------------------------------	------------------	----------------------

1	Bail - Bail Bond	Visible only for accused	While accepting, the magistrate can Request Bail Bond, which creates a pending task for submitting bail bond. The Bail Bond draft is automatically created with details from the application
2	Edit Litigant Details	Visible only for complainant	After acceptance by the magistrate, the changes requested in the application take effect. The details of the litigants in the case are modified
3	Case Settlement	-	-
4	Case Transfer	-	-
5	Case Withdrawal	-	-
6	Delay Condonation	Visible only for complainant	-
7	Generic	-	-
8	Rescheduling Request (Postpone and Prepone)	Visible when a hearing is scheduled in the case	While accepting, the magistrate selects a new hearing date, and the hearing gets rescheduled to this date
9	PoA Change	-	After acceptance by the magistrate, the POA holder's rights get transferred to the user specified in the application
10	Production of Documents	-	After acceptance by the magistrate, the documents attached to the application get added to the case file.
11	Addition of Witness	-	After acceptance by the magistrate, the witness is added to the case.
12	Certified Copy	Can be raised without logging in to the system and by people not a party to the case	After acceptance, a certified true copy of the application is generated.
	Advocate Replacement		Currently not an application, system action

New Application Types:

- Warrant by Hand
- Absent Application

- Reopen Evidence
- Warrant Recall

Application Templates and Specs

These need to be cleaned up. However, you can refer to these files for how they will look:

Application Attributes

Attribute	Description
Application Number	CMP Number
Application Type	The type of application
Date Created	The date draft was originally created.
Date Submitted	The date the application was formally submitted
Application Raised By	The advocate/PiP who signed the application
Application Raised On Behalf Of	The litigant on whose behalf the application was raised
Status	• Draft • Pending Signature • Pending Payment • Pending Review • Accepted • Rejected • Expired
Linked Order	The order accepting or rejecting the application
Objections (Linked Applications)	Any objections raised to the application
Objection To (Linked Application	For objections to the application against which it is being raised
